Imperial Crimson

The Greatest Lily Ever Created

FB 181 Imperial Crimson Strain Lily. Of all the fine Lilies originated by Jan de Graaff, the world's most famous Lily hybridizer, Imperial Crimson is his greatest achievement. It is a completely new type of Lily, the Empress of India x Auratum x Rubrum hybrid, which leads the way for fabulous new things in the exciting lily field. With the bold, flaring, banded style

of the Auratum and the rich red color of the Rubrum, it is a breathtaking sight in full bloom in July-August. Tremendous flowers, often reaching 8 to 10 inches across are borne like monarchs on strong 3 to 5 foot stems. And they are completely hardy, vigorous and so easy to grow, coming up year after year with more flowers each season. We are proud to be the first to feature this sensational new Lily. It has been offered in limited quantities for as much as \$10.00 each. At our low introductory price it can be planted in thousands of home gardens bringing joy and pleasure to all who see it. Guaranteed to bloom next summer. Postpaid.

We sell only the three varieties together so they can cross pollinize. This is an all season collection of varieties that start ripening in late June continuing through early August. Plant in a cluster, 4 to 6 feet apart. Branched 3-year old plants, almost 2 feet tall that will bear next year after planting.

Blueberries prefer an acid soil. You can make your soil acid by mixing peat moss or a handful or two of common sulphur with your soil when planting.

HARDY HEDGES TO BEAUTIFY YOUR HOME

HANDSOME *Bridal Wreath* Pictured Above

FH 3 Bridal Wreath (*Spirea Van Houtte*)—This photograph shows the beauty of Bridal Wreath, America's most popular and widely planted untrimmed flowering hedge. Millions of small white blooms cover the gracefully arching branches, every spring, without fail. Requires no special care and lasts a lifetime. Perfectly hardy, grows everywhere, in full sun or partial shade. You see it all over America and everywhere it is attractive and thriving. Makes a marvelous hedge or screen 5 to 6 feet tall. AMAZING ROSA *Multiflora*

FH 7 Rosa Multiflora Japonica—The conservation people recommend this for a living hedge where you have plenty of room, for erosion control and an excellent wild life refuge. However, we do not advise using it on small city lots because when not trimmed it makes a bushy, thorny plant 6 to 8 feet tall and almost as wide. Has white flowers in spring followed by red fruits which the birds like. Hardy up to central Iowa. We have seen many fine untrimmed hedges on farms. Plant 18 to 24 inches apart.

HARDY *Privet* HEDGE

FH 2 Hardy Russian Privet (*Amor River North*)—Is by far the most popular hardy trimmed hedge in the northern states. It makes a permanent hedge, lasting for generations. Not only adds beauty, it also protects your yard especially if you have a corner lot. It is fine for a division line between yards. Can be trimmed to any desired height, making a thick, dense hedge, without thorns, right down to the ground. Requires trimming only twice during the summer. Leaves are rich, dark green and hang on until very late fall. Plant 1 foot apart.

CHINESE ELM

FH 1 Chinese Elm—Is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in the fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all of the top, leaving only 5 to 6 inches above the ground. This will make a bushier, more dense hedge. Plant 8 inches apart.

However, we do not recommend planting north of central Iowa. It is by far the most attractive, hardy, fruiting, evergreen shrub. 3 Greatest Roses of All Time

Charlotte
Armstrong

Charlotte Armstrong FC 10—One of the world's best roses. Magnificent in the garden because of its great vigor, disease-resistant foliage and freedom of bloom. Long streamlined carmine buds open into enchanting flowers of the loveliest cerise, beautiful at all stages.

Crimson Glory FC 11—America's favorite red rose. Perfect buds open into large, magnificent blooms of velvety deep crimson. So fragrant that only a few flowers will perfume a room. A healthy grower, it produces beautiful flowers from late spring to frost.

Peace FC 58—The greatest rose ever created. The buds are rich gold edged cerise. As the outer petals unfold, the gold changes to canary then lightens to creamy ivory. The cerise edge gradually deepens and becomes broader so the fully open flower appears a sparkling cerise with a creamy-yellow base. Last unusually long, beautiful at all stages, retaining its perfect form.

Winter-Green

STAYS GREEN ALL WINTER

FS 155 Winter-Green (*Euonymus Manhattan*)—This is an improved selection of one of the most attractive and versatile of all shrubs. Brighter green foliage and it holds this rich green color through the winter far better than the regular Winter-Green. *The lustrous, glossy green leaves stay on all winter*, especially when planted in part or full shade. Makes a shapely bush 5 to 7 feet tall but can easily be trimmed to any desired height. Fine for foundation planting, as specimens, and a perfect background behind low shrubs, roses and perennials. Makes a wonderful hedge with its green foliage all through the winter. Thrives in sun or part shade, or even on the north side of house. Hardy here in southern Iowa but we do not advise planting farther north.

*...the most spectacular
SHRUB of this Century!*

FS 150 We believe this to be the finest red-flowering shrub in America. In May-June every plant is simply covered from top to bottom with hundreds and hundreds of lovely rosy-red flowers. They are trumpet-shaped, 1 to 1¼ inches across. After this first big display, there are some scattering blooms throughout the season. If you cut off sprays of flowers and use them for bouquets, the plant will flower even more freely than if you left them on.

At Hamburg, the Cardinal Shrub has withstood 15 below zero without injury. It is so easy to grow, not particular as to soil. Thrives in full sun or part shade. It makes a shapely bush 5 to 6 feet tall with excellent foliage. Used as an untrimmed hedge, it will be the sensation of your neighborhood.

Look over your yard, whether large or small. You will find a spot where it will help make your home more beautiful. Plants set out this fall will bloom next spring. We ship them to you POSTPAID, trimmed ready for planting, at the proper planting time for your locality.

ROYAL PURPLE SMOKE TREE

**... the most striking shrub
we have ever seen!**

FS 40 (*Rhus Cotinus Atropurpurea*, Royal Purple). From the moment the first leaf unfurls in early springtime until late autumn, here is an amazing shrub to make that sunny spot in your yard GLOW with rich purple color! At first, the foliage alone thrills you with its unusual shade of glossy purple. But then what a glorious surprise in mid-summer when feathery flowers as sheer as chiffon transform this shrub into a smoke-cloud of enchanting purple.

So colorful among the common green shrubs—and the filmy purple flowers and foliage make “conversation-piece” bouquets. Grows 8 to 10 feet tall, marvelous for shrub borders or as an individual specimen! Completely hardy here at Hamburg, but we do not advise planting north of central Iowa.
